

Music & the Internet

MUMT301

Gabriel Vigliensoni
Schulich School of Music
McGill University

Plan

- Final project ideas
- Ishani and Zoe's presentation
- DOM and HTML forms, in-class exercise
- Mid-term exam

Potential final projects

- Music recommendation site using 3rd-party APIs (e.g., Allison Hecht's Veggify)
- Music playlist maker (e.g., Samuel Pare's WebVideoWalk)
- Substantial music composition (20-30 min) strictly using web resources (e.g., Rituals by Cole Barbour)
- Comprehensive comparison of on-demand music streaming services or music distributors
- History of the recording industry in the age of the Internet
- Statistical / historical analysis of music industry based on web-based data
- Study of international music copyright laws
- Web-based musical instrument or controller

DOM and HTML forms
